

Cash Registers QX8000

**High performance low cost EPOS -
HOSPITALITY & RETAIL**

Built with quality, reliability and affordability in mind the Uniwell QX-8000 offers many of the features normally only found in touch screen based EPOS systems. It can be connected to a back office PC and to the internet so you can view on-line web based reports or receive daily emails of sales and performance.

The internal twin station printer produces stylish customer receipts along with a paper and electronic audit roll, plus it can be used to produce food orders for the kitchen, drink orders for the bar or for ticketing applications such as admissions. Powerful configurable software and a wealth of interface options such as CCTV allow these machines to be installed in most market sectors.
